

**Design Brief:            Design and build a class shadow puppet screen**

Your task:

Design a class shadow puppet screen that:

- is big enough for up to three students to be puppeteers at one time
- is strong and stable
- is portable
- can be stored easily

Draw your design, labelling the different materials used (in Bahasa Indonesia if you can) and giving measurements where appropriate.

Explain the features of your design and how it meets the design criteria:
